APURVA ASHOK SARODE
Data Engineer
Email ID: ankitha.m@baanyan.com
Contact No: (732)-414-7397

PROFESSIONAL SUMMARY:

- **Over 9 years** of **IT** experience in **Data Engineering** and **Software Development** across various business domains.
- Strong expertise in building **ETL pipelines for** batch and streaming data using **Spark** and **Spark SQL.**
- Extensive experience with **AWS and Azure cloud technologies**
- Skilled in Data Engineering technologies, such as **Hadoop 2, Spark**, and **Elastic MapReduce**.

EDUCATION:

Master of Science in Computer Science
Cleveland State University, OH, USA Aug 2022 – May 2024

Bachelor of Engineering in Computer Science Jul 2013 – May 2017
Pune University, MH, India

CERTIFICATIONS

Certified in Azure Data Engineer
Master's Program in Big Data using AWS

TECHNICAL SKILLS:

Languages	Python, Java, Scala, SQL
OLAP Tools	OLAP Suite, Business Objects
ETL Tools	SSIS, AWS Glue, Apache Airflow, EC2, EMR, S3, Lambda, Athena, and Redshift, **Azure Data Lake Storage (ADLS)**, **Azure Synapse Analytics**, **Azure Databricks**, and **Azure Data Factory**
Databases	Oracle, MS SQL Server, MS Access, DB2, MySQL
Cloud Platform	AWS, Azure, GCP
Big Data	Apache Spark, Apache Kafka, HBase, Hive, MongoDB, Hadoop
Operating Systems	Windows Family, Linux, MacOS

PROFESSIONAL EXPERIENCE

Client: NeueHealth Inc, Minneapolis, MN **Dec 2024 - Present**
Role: Data Engineer
Responsibilities:

- Develop and maintain Spark-Scala ETL pipelines to efficiently extract, transform, and load large healthcare datasets (e.g., patient records, clinical data, claims data).
- Ensure data integrity, cleanliness, and consistency in pipelines.
- Work with large-scale datasets to apply complex transformations using Spark (such as aggregations, joins, filtering, and cleaning).
- Ensure transformations meet business requirements and quality standards.
- Integrate data from multiple healthcare data sources (such as EHR, claims, and other third-party systems) into Azure cloud environments using Azure Data Factory, Databricks, or other relevant tools.
- Work on building and managing the **Bronze, Silver, and Gold** layers in the data lake, ensuring proper storage, data processing, and accessibility of healthcare data.
- **Bronze**: Raw data ingestion layer (e.g., unprocessed data from various sources).

- **Silver**: Cleaned, structured, and transformed data (processed and refined for analytics).
- **Gold**: Aggregated, business-critical data used for insights and reporting.
- Utilize services like **Azure Data Lake Storage (ADLS)**, **Azure Synapse Analytics**, **Azure Databricks**, and **Azure Data Factory** to implement the Medallion Architecture.
- Ensure data flow between layers is automated, efficient, and scalable.

Client: Premier Bank, Defiance, OH **Jun 2023 – Nov 2024**
Role: Data Engineer
Responsibilities:
- Handled structured and unstructured data, performing cleaning, descriptive analysis, and dataset preparation.
- Set up storage and data analysis tools within the **Amazon Web Services (AWS)** cloud infrastructure.
- Developed and maintained large-scale data pipelines using **Apache Spark, Hadoop**, and **Kafka** to process and analyze terabytes of structured and unstructured data efficiently.

Environment: Python, Spark, Tableau, JSON, XML, SQL, Hive, Agile and Windows.

Client: Invacare, Elyria, OH **Aug 2022 – May 2023**
Role: Data Engineer
Responsibilities:
- Collaborated on ETL (**Extract, Transform, Load**) tasks, maintaining data integrity and pipeline stability.
- Designed and implemented end-to-end data solutions (storage, integration, processing, and visualization) in **AWS**.
- Migrated datasets and **ETL workloads with Python from On-prem to AWS Cloud services.**

Environment: AWS, MDM, GIT, Unix, Databricks, PySpark, Hadoop.

Client: The Home Depot, USA **Nov 2021 – Jul 2022**
Role: Data Engineer
Responsibilities:
- Created data pipelines with **AWS S3** to extract data, store it in **HDFS**, and deploy machine learning models.
- Designed, built, and maintained scalable **ETL data pipelines** from various sources into data storage systems or data warehouses.

Environment: SQL, ETL, AWS, SAS, Databricks, Machine Learning, Python

Client: Paypal, USA **Aug 2020 – Nov 2021**
Role: Data Engineer
Responsibilities:
- Constructed a **data pipeline** to process semi-structured data using **Apache Spark**, integrating 100 million raw records from 14 different data sources.
- Developed and deployed data ingestion frameworks using **Apache Kafka** Connect and Apache Flume, automating the integration of data from various sources into the data lake.

Environment: Hadoop, Spark, NoSQL, AWS, Oracle, Windows, Python, SAS

Client: Circana LLC, Pune, India **Aug 2018 – Jan 2020**
Role: Data Engineer
Responsibilities:
- Collaborated with a team of four to establish a cloud-first data ingestion system, utilizing **Azure, Apache Spark**, and **Kafka** to ingest data from diverse sources, enhancing data processing speed by 74%.

- Integrated data from internal and external sources to ensure seamless data flow and enable comprehensive data analysis.
- Designed **SQL tables** with referential integrity and developed advanced queries using stored procedures and functions in **SQL Server Management Studio**.

Environment: Hadoop, Spark, NoSQL, Oracle, SQL Server, Azure, Apache Spark, Kafka, Spark, Hive.

Bajaj Allianz Life Insurance Company Limited, Pune, India **Jan 2017 – Jul 2018**
Data Engineer
Responsibilities:

- Created data pipelines with **AWS S3** to extract data, store it in **HDFS**, and deploy machine learning models.
- Designed, built, and maintained scalable **ETL data pipelines** from various sources into data storage systems or data warehouses.

Environment: Python, ETL, BI, Spark, SQL, Machine Language, and AWS.

Client: Velotio Technologies Pvt Ltd, Pune, India **Jun 2015 – Dec 2016**
Role: Data Engineer
Responsibilities:

- Designed, developed, and maintained scalable data pipelines using modern data engineering tools and frameworks (e.g., **Apache Spark, Apache Kafka, AWS Glue**) to support business intelligence, analytics, and data science initiatives.

Environment: Python, GDPR, CCPA, SQL queries, ETL, Apache Spark, Apache Kafka, AWS Glue, Oracle, Windows.
