Sirisha Duggi
Oracle Applications DBA
Email: **sirishaduggi.dba@outlook.com** | Mobile No: **512 866 3252**

Profile Summary

- Oracle Application DBA, WebLogic Administration and Oracle Fusion Applications with 13+ years of extensive IT experience on large scale Oracle E-Business Suite R12/11i. Responsibilities included installation, patches, concurrent manager administration, cloning, Oracle Applications Sys Admin functions, backup/recovery, troubleshooting.
- Experienced Oracle EBS and Fusion Cloud consultant with expertise in designing, implementing, and supporting integrations between these systems.
- Documenting and attending daily status calls with clients and sharing the updates.
- Preparing evidence and sharing the audit report documents to GRC team and presenting weekly updates to client and preparing SOP's for the enhanced features.
- Documenting RCA for the P1 incidents and presenting to client in scheduled weekly review call.
- Results-driven Infrastructure Engineer & SRE with expertise in Oracle EBS migrations, upgrades, and Exadata optimization.
- Extensive skilled in automation using Python and Shell, security patching, OS upgrades, and middleware management.
- Good knowledge in SRE principles, including proactive monitoring, troubleshooting, and system reliability enhancements.
- Hands-on experience working across all phases of the Software Development Life Cycle (SDLC), including requirements gathering, design, development, testing, deployment, and support.
- Actively participated in Agile Scrum ceremonies included daily stand-ups, sprint planning, backlog grooming, and sprint retrospectives to ensure continuous delivery of high-quality software.
- Designed and developed data warehouse solutions to support enterprise-level reporting and analytics, enabling efficient data consolidation from multiple operational systems.
- Created ETL workflows using PL/SQL and SQL Loader to extract, transform, and load data into reporting schemas for monthly executive dashboards.
- I am good at researching and integrating open-source technologies to optimize infrastructure performance.
- Proven ability to lead high-impact infrastructure projects while ensuring scalability, security, and operational efficiency.
- Experience in supporting multiple Production, Test, Development, Migration instances and Fusion Middleware products WebLogic, SOA.
- Experience in database upgrades from 12c to 19c.
- Experience in application upgrade from 12.1.3 to 12.2.12.
- Knowledge in Golden gate.
- Worked on BEA WebLogic 8.x, 9.x, 10.x, 11 Server, Apache http Server, as administrator for Server Installations, Configuration, Application components deployment, including troubleshooting and maintenance.e.
- Experience in SSO related issues
- Experience in integrated Power BI with Oracle databases to create automated, real-time reports for senior leadership on patching status, backup jobs, and database performance trends
- Experience in configuring and managing secure environments using SSL and digital certificates.
- I have working knowledge in finding Memory Leaks and adjusting **JVM Heap** Size and **Garbage Collector** parameters during **performance monitoring** and **performance tuning** of WebLogic server.
- Good working knowledge in configuring multiple WebLogic domains including machines, managed servers, node managers and cluster environments.
- Optimized database performance using AWR, ADDM, and OEM Grid Monitoring, improving the response time of critical business applications.
- Experience in loading data using data pump utilities.
- Managed Table spaces, Data files, Alert logs for database maintenance and provided 24x7 on-call support for Oracle ERP applications and production databases.
- Working closely with Oracle Development and Support on bug fixes by raising Service Requests, conducting Oracle Web Conferencing, and Incident/Change management activities.
- Experience on ADutilities like adpatch, adadmin, adconfig, adclone, adctrl, admrgpch.
- Hands on experience in applying CPU/PSU, WIN SEC patches

- Knowledge on data guard
- Provided 24x7 on call support in production environment on rotation basis

Technical Skills

- Oracle Applications : Oracle Apps R12.1.3, R12.2.12
- Oracle Fusion : Oracle SOA Suite 11g (BPEL, BPM, HWF, Rules Engine, BAM…), OSB
- Application Server : WebLogic 11g
- Databases : Oracle 10G and 11G
- Operating Systems : Sun Solaris UNIX, Red hat Linux.
- Tools & Techniques : Enterprise Manager 10g, 11g, NSI, HPPM and Ticketing Tools like Service now

ACADEMIC BACKGROUND

- Bachelor's and Master's in computer applications from IGNOU – Hyderabad
- **Certifications**

  AWS Certified Solutions Architect – Associate

  AWS Certified Cloud Practitioner

  Oracle Cloud Database 2023 Migration and Integration Professional

  Google Cloud Certified Cloud Digital Leader

  AZ-104 Microsoft Azure Administrator – Trained

  Oracle Fusion Cloud Applications ERP Foundations Associate (1Z0-1160-1)

Professional experience Summary

Client	**Designation**	**Duration**
HCL	Sr. Oracle Apps DBA	Feb 2023 - Till Date
Cognizant Technology Solutions (CTS)	Sr. Oracle Apps DBA	June 2021 – Feb 2023
4Pillars Infotech Pvt. Ltd	Oracle Apps DBA	Aug 2020 – May 2021
Primus Global Technologies (Oracle Client)	Oracle Application DBA	Aug 2017 – July 2020
General Electric (GE)	Oracle Applications DBA	May 2012 – Aug 2017

Client/Project Assignment

WORK EXPERIENCE

CLIENT: Boeing | Feb 2023 to Till date

Role: Oracle Apps & Fusion DBA

- Applied patches using ADOP on Oracle Applications Production and Non-Production instances
- Good experience in Managing and optimizing Oracle databases, EBS, Fusion Middleware, and Exadata, ensuring high availability and performance.
- Gathered business requirements and prepared functional/technical design documents for integration projects.
- Developed and tested integration flows using Oracle Integration Cloud
- Conducted unit testing and prepared test plans for integration objects.
- Upgraded application upgrade from 12.1.3 to 12.2.12.
- Developed and maintained Power BI dashboards to visualize key database metrics, monitor system health, and track SLA compliance for production and non-production environments.
- Provided support and guidance to business users on Oracle Fusion Cloud applications.
- Documenting and attending daily status call with clients and sharing the updates.
- Preparing evidence and sharing the audit report documents to GRC team and presenting weekly updates to client and preparing SOP's for the enhanced features.
- Documenting RCA for the P1 incidents and presenting to client in scheduled weekly review call.
- Worked on security patch analysis and OS upgrades to enhance system stability and security
- Leading Oracle EBS migration and upgrade projects, ensuring seamless transitions with minimal downtime.
- Developed automation scripts using Python and Shell to streamline operational tasks and improve system reliability.
- Applied SRE principles, focusing on proactive monitoring, incident response, and performance tuning.
- Troubleshooting OS and network issues, improving system resilience and operational efficiency.
- Maintained GitHub repositories, contributing to CI/CD pipelines and infrastructure automation.
- Collaborated cross-functionally to deliver high-quality project implementations within deadlines.
- Cloning Non-Prod Instances from production using RMAN
- Performed Data Guard switchover/failover as per the requirements.
- Created monitoring scripts to send alerts in case standby is out of sync.
- Configuring and managing two nodes UNIX RAC environment for high availability, highly busy databases
- Worked in Oracle 10g/11g RAC environment and troubleshooting for RAC issues.
- Worked on RAC/ASM interconnect issue.
- Performed the migration and up-gradation of Oracle databases by using import/export, Oracle Data Pump, and Transportable tablespaces.
- Upgraded and patched Oracle binaries in the development environment and production environment.
- Upgraded Oracle from 12.2.0.1 to 19c
- Managed logical/physical backups for these databases depending on the nature of database set up either full export, partial export or export of just the structure of schema objects.
- Utilized SQL Loader ETL to perform bulk data loads into database tables from external data files.
- Performed SQL tuning by using Explain Plan and AWR/ADDM.
- Extensive experience in Oracle database administration, including upgrades, migrations, and performance tuning.
- Proven ability to successfully replicate and migrate Oracle databases to the Cloud.
- Expertise in providing database and application connectivity for testing environments.
- Proven experience in executing successful upgrades of Oracle databases to version 19c or higher, including direct upgrades from 12c to 19c.

- Experience in Golden gate.
- Quarterly performing password change activity on Production instances.
- Before arriving of peak season performing Index rebuild on tablespaces and reorg activity.
- Attending GTM on schedules as per Rimini case updates and fixing the issues with Rimini engineer.
- Issues fixing to production RMAN failure.
- Supported Oracle Applications R12.1.3 and R12.2.12 on production and non-production Environments.
- SSO related user login issues ie., sync issues will resolve

Client/Project Assignment

WORK EXPERIENCE

CLIENT: Mattel | June 2021 – Feb 2023

Role: Oracle Apps DBA

Responsibilities:

- Applied patches using ADOP on Oracle Applications Production and Non-Production instances
- Cloning Non-Prod Instances from production using RMAN
- Led the end-to-end migration of Oracle EBS to a modernized infrastructure, optimizing performance, security, and scalability. Conducted impact assessments, implemented security patches, and automated monitoring for proactive issue resolution.
- Leveraged Exadata optimizations to enhance database performance and scalability.
- Performed Data Guard switchover/failover as per the requirements.
- Created monitoring scripts to send alerts in case standby is out of sync.
- Configuring and managing two nodes UNIX RAC environment for high availability, highly busy databases
- Worked in Oracle 10g/11g RAC environment and troubleshooting for RAC issues.
- Worked on RAC/ASM interconnect issue.
- Performed the migration and up-gradation of Oracle databases by using import/export, Oracle Data Pump, and Transportable tablespaces.
- Upgraded and patched Oracle binaries in the development environment and production environment.
- Upgraded Oracle from 12.2.0.1 to 19.0.0.0.
- Managed logical/physical backups for these databases depending on the nature of database set up either full export, partial export or export of just the structure of schema objects.
- Utilized SQL Loader ETL to perform bulk data loads into database tables from external data files.
- Performed SQL tuning by using Explain Plan and AWR/ADDM.
- Extensive experience in Oracle database administration, including upgrades, migrations, and performance tuning.
- Proven ability to successfully replicate and migrate Oracle databases to the Cloud.
- Expertise in providing database and application connectivity for testing environments.
- Proven experience in executing successful upgrades of Oracle databases to version 19c or higher, including direct upgrades from 12c to 19c.
- Quarterly performing password change activity on Production instances.

- Before arriving of peak season performing Index rebuild on tablespaces and reorg activity.
- Attending GTM on schedules as per Rimini case updates and fixing the issues with Rimini engineer.
- Issues fixing to production RMAN failure.

- Supported Oracle Applications R12.1.3 and R12.2.12 on production and non-production Environments.
- SSO related user login issues ie., sync issues will resolve
- User responsibility and login issues taken care.

Client/Project Assignment

WORK EXPERIENCE

CLIENT: Data intensity | Aug 2020 – May 2021

Role: Oracle Apps DBA

Responsibilities:

- Applied patches using ADOP on Oracle Applications Production and Non-Production instances.
- Cloning Non-Prod Instances from production using rapid clone & RMAN.
- Performed System Administration activities including User and Responsibilities creation, Concurrent Managers, Profile options, Defining printers, User management and Workflow administration.
- Supported Oracle Applications R12.1.3 and R12.2.4 on production and non-production Environments.
- Managed and maintained the oracle applications using adutilities like adpatch, adadmin, adconfig, adclone, adctrl, admrgpch.
- Experience on deploying mule soft applications through Jenkins.

Client/Project Assignment

WORK EXPERIENCE

CLIENT: Oracle India Ltd (End Client: JP Morgan Chase) | Aug 2017 – July 2020

Role: **Oracle Apps DBA with Weblogic Administrator**

Responsibilities:

- Installed, Configured and administered Oracle WebLogic BEA Server 11g in Development, Test and Production Environments.
- Monitoring OEM alerts and fixing the alerts, raising the Bug as and when required.
- Experience in applying Weblogic patches (BSU) as when required, installing certificates, working on bugs, SR's and RFC's.
- Deployed applications (WAR, JAR and EAR) using WLST and WebLogic Console.
- Maintained Load balancing, high availability and Fail over for the servers
- Involved in tuning the server.
- Involved in performance tuning of JVM and used Garbage collection Algorithms for better performance.
- Monitor and managing the WebLogic server instances using WLST
- Involved in trouble shooting and fixing day-to-day problems of the applications in production, production-Fix and testing environments.
- Provided 24x7 on-call support for production / non-production environments.
- Supporting Oracle Applications 12.2.4 on Production and non-Production Environments
- Performed purging activities like ESS Purge, SOA Purge as per customer requirement

- Applied patches using ADOP, Opatch and BSU utilities on Oracle Applications Production and Non-Production instances.
- Applying EBS patches in ADOP cycle and troubleshoot issues if any.
- EBS Cloning and Troubleshooting.
- Supported the RAC and non-RAC database for Prod and non prod.
- Running gather statistic's on particular schemas from SQL*PLUS.
- Maintaining and Administering Application users.

Environment: Oracle E-Business Suite R12.2.4, R12.1.3 Oracle database 11gR2, 11g (WebLogic, OBIEE, GRC, SOA), Enterprise manager cloud control 12c, Oracle Enterprise Linux, Oracle Sun Solaris 10

Client/Project Assignment

WORK EXPERIENCE

CLIENT: GENERAL ELECTRIC OIL & GAS | May 2012 – Aug 2017
Oracle Applications DBA – ***Pascal and Oscar Business Solutions***

- Applied patches using ADOP on Oracle Applications Production and Non-Production instances.
- Cloning Non-Prod Instances from production using rapid clone & RMAN.
- Performed System Administration activities including User and Responsibilities creation, Concurrent Managers, Profile options, Defining printers, User management and Workflow administration.
- Supported Oracle Applications R12.1.3 and R12.2.4 on production and non-production Environments.
- Managed and maintained the oracle applications using adutilities like adpatch, adadmin, adconfig, adclone, adctrl, admrgpch.
- Worked with Oracle for Different Service Requests to resolve the critical issues.
- Used HPPM tool for code migrations and resolved the user tickets through Service Now ticketing system.
- Worked on new site implementations, releases and managed support teams to ensure a smooth Go-Live.
- Implemented maintenance activities and improved the performance and reduced Disk Space costs.
- Monitoring EBS, Middle tier and Databases through Oracle 12C OEM.
- Supported the Fusion middleware components (WebLogic 11g, OBIEE, SOA) and Oracle Discoverer 10g with Oracle 11.5.10.2 instance.

Environment: Oracle E-Business Suite R12.2.4, R12.1.3Oracle database (RAC and non-RAC) 11gR2, 11g (WebLogic, SOA), Enterprise manager cloud control 12c, Oracle Enterprise Linux, Oracle Sun Solaris 10
